Questions:

Create a simple web page using **HTML and PHP** that does the following:

1. Sets the page title to **"My Favorite Car"**.

2. Displays a heading in any color saying, **"Car Details"**.

3. Uses PHP to create an array containing the details of a car:

   o Brand: Ford

   o Model: Mustang

   o Year: 1964

4. Displays the model of the car separately on the page.

5. Loops through the array using a foreach loop and displays each **key and value** on a separate line.

6. The page should use only HTML and PHP.
